## Fiji Broadsheet

GTAV has produced an A2 broadsheet rich in data to support the teaching of the Pacific at VELS Level 5 and to develop the knowledge and understanding of one Pacific nation – Fiji. Geospatial skill development can be enhanced through the range of data that includes a topographic map extract, rainfall and land use maps, numerous images, and a variety of statistical data, often represented as tables and using assorted graph styles.

To support this broadsheet the GTAV website offers a scenario approach to develop student knowledge and understanding of the characteristics of the region, to explain the interaction between the physical processes and the human activities, and to consider the contrasts within Fiji. Teachers might choose to utilise the individual questions in other ways. The rich data is there to assist in the teaching of the Pacific region.
